

# MOBILE WAREHOUSE SOLUTION

## OPTIMIZE WAREHOUSE PROCESSES WITH A MOBILE WMS SOLUTION FOR MYOB GREENTREE

**Mobile WMS** from Tasklet Factory supports the work processes in the warehouse and integrates to the standard functions of MYOB Greentree.

It features a stunning graphical user interface which is easy to use and can be configured to fit the needs of the individual user. Your warehouse employees will be more efficient and make fewer mistakes as **Mobile WMS** provides the tools and information needed to work effectively. Installation and support of the solution is easy as it is directly integrated with the standard features of MYOB Greentree.

## ADVANTAGES

### **MYOB Greentree**

**Mobile WMS** is 100% integrated with standard MYOB Greentree .

### **REDUCE ERRORS, NO PAPERWORK**

Moving from a paper based work process to a fully automated mobile solution will reduce the number of errors significantly. Item registrations are validated using the built-in barcode scanner.

### **ON/OFFLINE FUNCTIONALITY**

The core working processes can be performed without any network connection. The result is a stable solution with great performance.

## ADVANTAGES

### USER-FRIENDLY

**Mobile WMS** has been designed with focus on minimizing clicks and irrelevant information. Users will spend minimal time on user training and they quickly learn to master the mobile device.

### ADAPTABLE, TAILORED TO YOUR NEEDS

The standard functionality covers the needs of most companies, but sometimes a special work process needs a special solution. **Mobile WMS** has been designed so it can be extended with custom functionality easily. All modifications are done directly in MYOB Greentree .
